

IP Justification Form

CariNet, Inc. (hereafter referred to as " CARI.net ") conforms to the North American IP Registry (ARIN) policies regarding IP address assignment. As part of our standard service, CARI.net will assign the amount of IP addresses that customers can justify for use on their own and their client's equipment. Use this form for initial assignments as well as any additional IP addresses requested. We require a written justification form for any IP address blocks requested so that we can demonstrate to ARIN that IP addresses allocated to CARI.net are being used efficiently. Per ARIN guidelines (<http://www.arin.net/policy/index.html>), organizations will be assigned address space based on immediate utilization plus a six month and twelve month projected utilization. Organizations must exhibit a high confidence level in their six month and twelve month utilization rate and supply documentation to justify the level of confidence. If you have any questions about the IP assignment policy or process, please refer to the IP Address Assignment Policy and Procedures (<http://www.arin.net/policy/nrpm.html>).

CARI.net will not generally assign IP blocks greater than /24 (class-c) to new customers. If a new customer is transferring their service from another provider, CARI.net will assign a block greater than or equal to their existing assignment provided that the below holds true for their existing assignment.

Existing customers must have efficiently utilized all previous assignments and at least 80% of their most recent assignment in order to receive additional space. This includes all space in use by their Clients. Please note that until your prior utilization is verified to meet the 80% requirement, CARI.net can neither process nor approve a request for additional addresses.

Utilization rate of address space is a key factor in justifying a new assignment of IP address space. Requesters must show exactly how previous address assignments have been utilized and must provide appropriate details to verify their one-year growth projection. The minimum criteria that must be met are:

- A 25% immediate utilization rate, and
- A 50% utilization rate within one year.

If the customer does not meet the minimum criteria, CARI.net reserves the right to revoke the assignment and reassign an appropriate number of IP addresses. _____ Initial

The form for justifying IP use is provided below. Please complete the form and submit it to CARI.net sales via fax at 858-974-5091. If you have any questions about filling out this form, please call us at 858-974-5080. Thank you.

858-974-5080 - Fax 858-974-5091

iBizPanel Account ID: _____

List of IPs currently assigned to your company:

Number of IP Addresses being requested at this time:

Number of IP addresses from this assignment to be used immediately:

Number of IP addresses from this assignment to be used within six months (projected):

Number of IP addresses from this assignment to be used within twelve months (projected):

Remember: If your organization already has IP space assigned, you must utilize 80% of those IPs before applying for more IP space.

Please use the space provided below to describe how you currently assign your existing IP space (if any) and why you require the number of IP addresses requested above. Please note that equipment behind firewalls/routers do not require globally unique IP addresses (such as the use of "Network Address Translation" [NAT]). Please indicate whether you are already conserving address space using a form of NAT. If additional IP space is required for domain hosting, please indicate why you do not use "Name-Based Virtual Hosting," such as SSL. If additional space is needed to explain your justification for IP addresses, you may attach an addendum to this form.
